Experiment-12

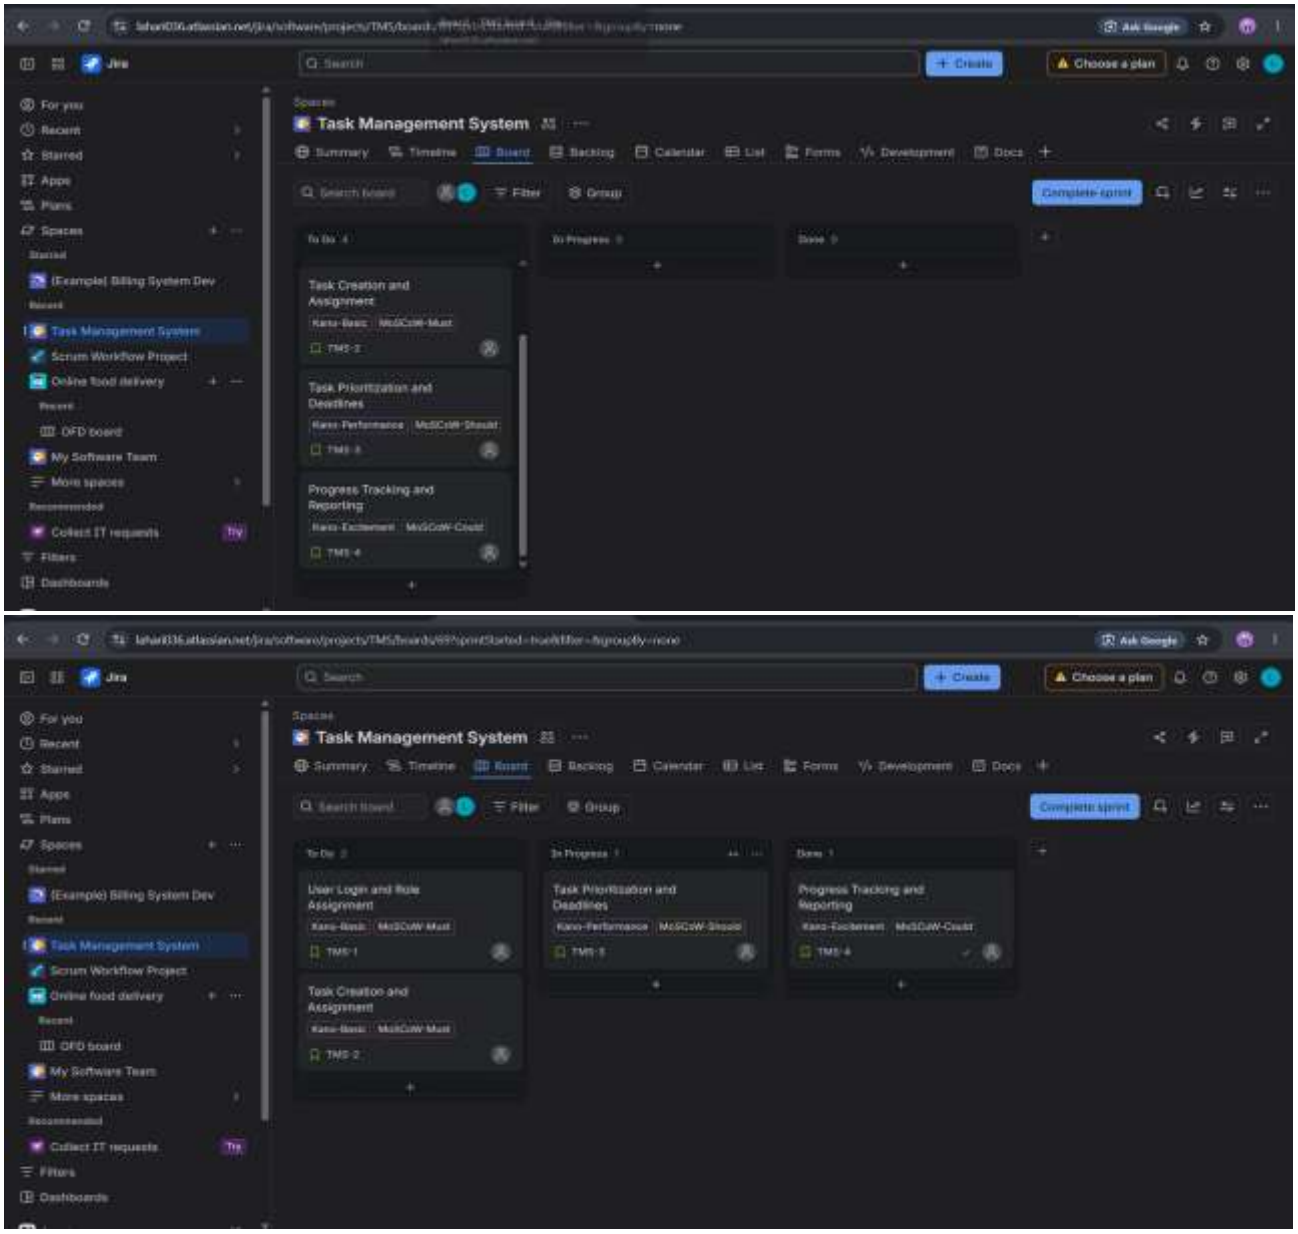

PRIORITIZING TASK MANAGEMENT SYSTEM REQUIREMENTS USING MOSCOW AND KANO IN JIRA

AIM

To create the requirements of a Task Management System as Jira issues and prioritize them using the MoSCoW and Kano models.

Procedure:

1. Open Jira and log in to your account.
2. Create a new project named **Task Management System**.
3. Navigate to the Backlog or Issues section.
4. Create issues for the system requirements, such as:
    - User Login and Registration
    - Create and Assign Tasks
    - Set Task Deadlines
    - Task Status Tracking
    - Notifications and Reminders
    - Generate Reports
5. Apply the **MoSCoW prioritization** technique:
    - **Must Have:** User Login, Create Tasks.
    - **Should Have:** Task Deadlines, Status Tracking.
    - **Could Have:** Notifications and Reminders.
    - **Won't Have:** Advanced Reports (in the current version).
6. Apply the **Kano Model** to classify requirements:
    - **Basic:** User Login and Task Creation.
    - **Performance:** Task Tracking and Deadlines.
    - **Excitement:** Smart Notifications and Reminders.
7. Add the priority labels to the corresponding Jira issues.
8. Review the prioritized requirements and save the changes.

Result:

Successfully prioritized Task Management System requirements in Jira using MoSCoW and Kano models. The requirements were classified based on their importance and user satisfaction, helping to organize development tasks effectively.
