EXP- 5

MoSCoW – Library Management System

Aim

To categorize requirements using MoSCoW method.

Procedure

1. List all requirements.

2. Analyze impact & feasibility.

3. Categorize into:

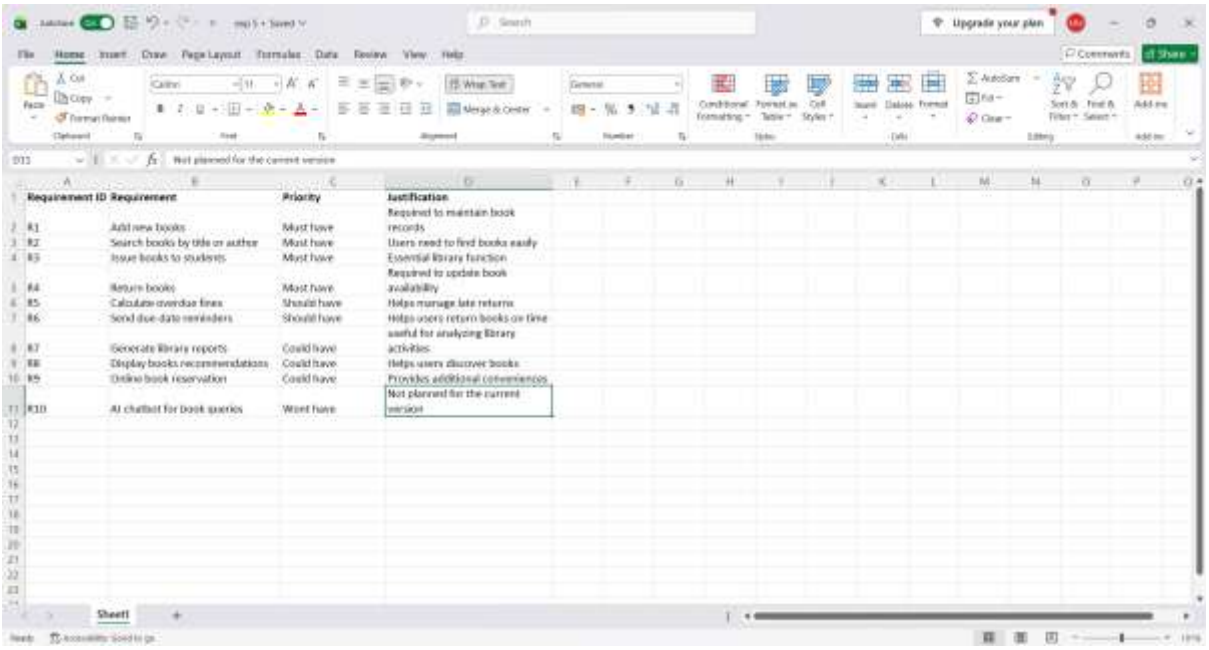

●Must Have , Should Have

●Could Have

●Won’t Have

4. Enter into Excel/Google Sheet.

5. Add justification column

Requirement ID	Requirement	Priority	Justification
R1	Add new books	Must have	Required to maintain book records
R2	Search books by title or author	Must have	Users need to find books easily
R3	Issue books to students	Must have	Essential library function
R4	Return books	Must have	Required to update book availability
R5	Calculate overdue fines	Should have	Helps manage late returns
R6	Send due date reminders	Should have	Helps users return books on time
R7	Generate library reports	Could have	useful for analyzing library activities
R8	Display books recommendations	Could have	Helps users discover books
R9	Online book reservation	Could have	Provides additional convenience
R10	AI chatbot for book queries	Wont have	Not planned for the current version

Result: Thus, The Requirements categorized successfully using MoSCoW prioritization
