Experiment-8

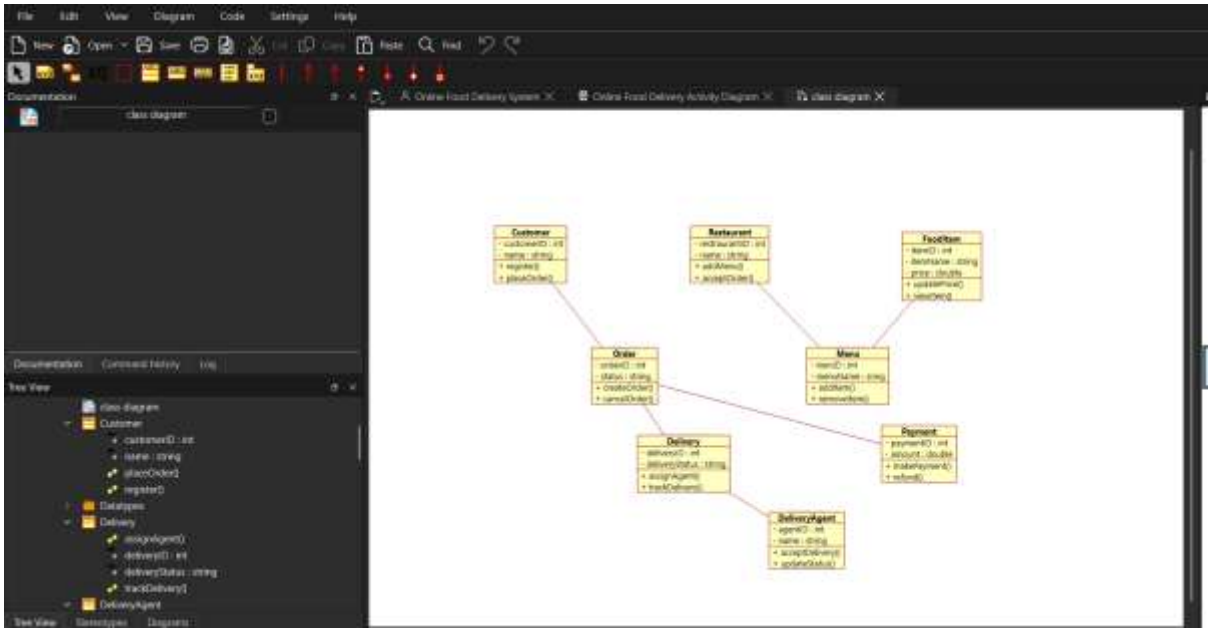

UML Class, Use Case and Activity Diagrams for an Online Food Delivery System

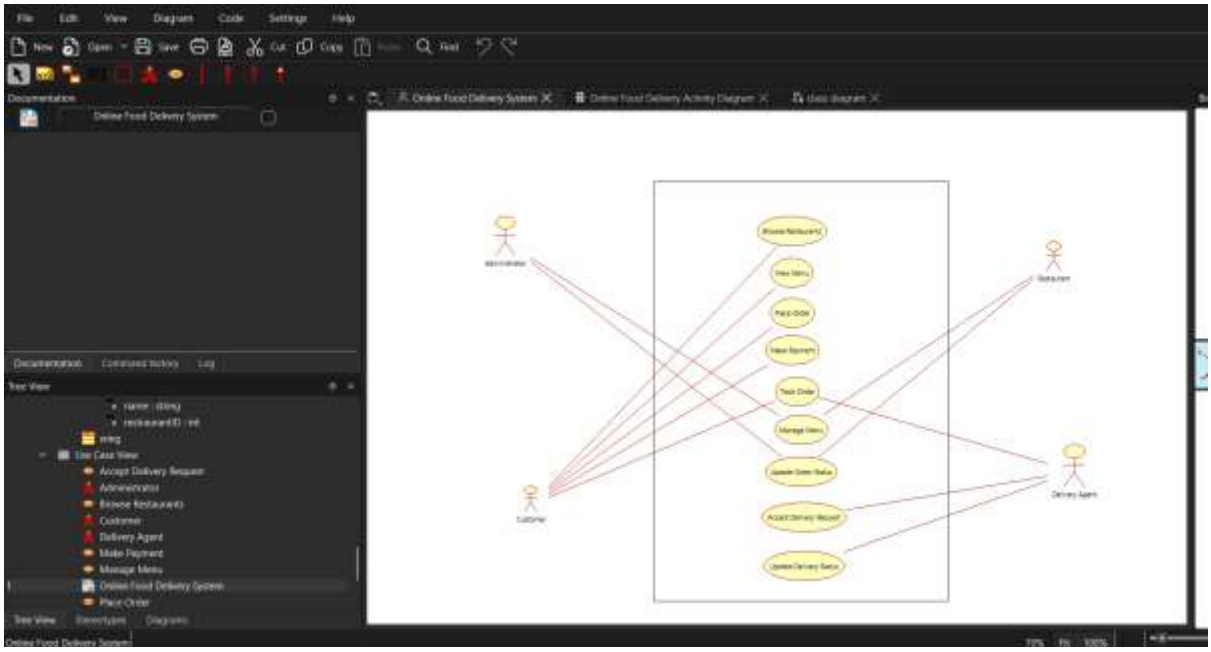

Aim:

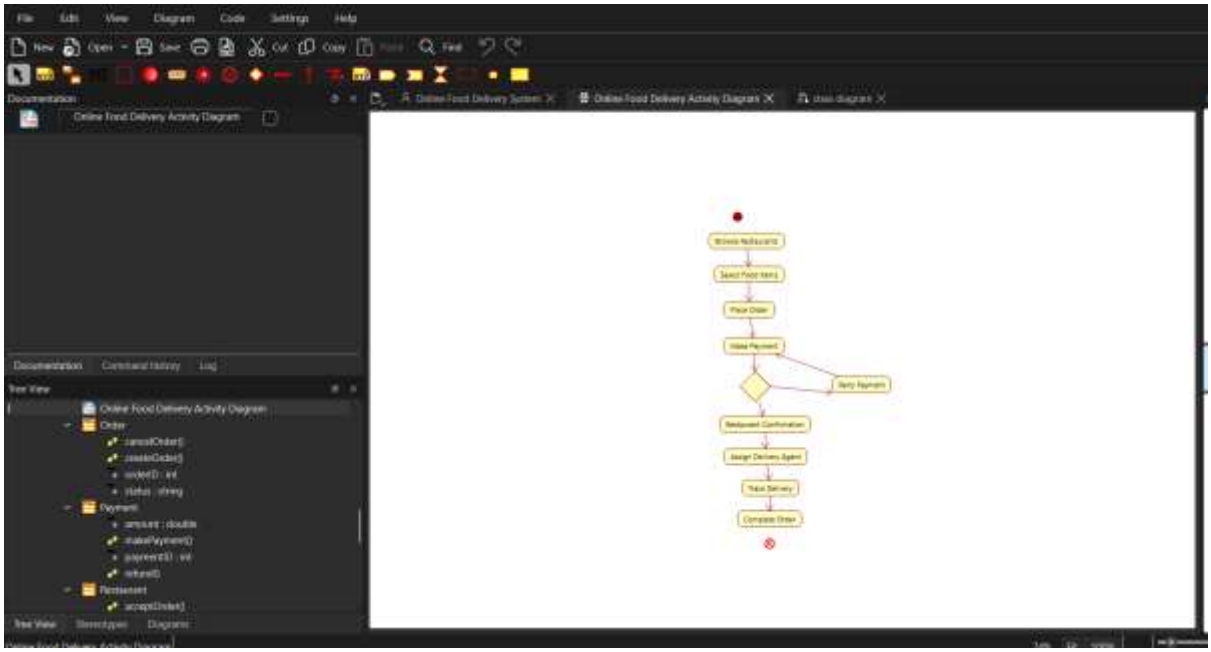

To design UML Class, Use Case and Activity Diagrams for an Online Food Delivery System.

Procedure:

1. Identify the actors, classes and activities involved in the food delivery system.
2. Draw the Use Case Diagram to represent user interactions.
3. Draw the Class Diagram with classes, attributes and methods.
4. Draw the Activity Diagram to represent the order placement and delivery process.
5. Verify the diagrams and save the output.

Result:

Thus, the UML Class, Use Case and Activity Diagrams for an Online Food Delivery System were successfully designed.
